EDUCATION

Vellore Institute of Technology

Btech in Cloud Computing and Automation

Sep 2022 – Sep 2026

Bhopal, India

City Montessori School

CISCE

Apr 2010 – Apr 2020

Lucknow, India

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML, CSS, NoSQL

Frameworks: Node.js, React

Dev Tools: Docker, Amazon Web Services, OpenCV, MediaPipe,

PROJECTS

tourINDIA 🔗 | [HTML](#), [CSS](#), [JavaScript](#), [Node.js](#), [MongoDB](#)

Nov 2025

- Developed a **travel recommendation web app** that allows users to **search tourist places across Indian cities** and maintain a **personal visit log** after login.
- Implemented a **real-time wishlist system** to let users shortlist and organize destinations they wish to visit.
- Integrated **dynamic map directions** with shortest route planning to assist users in efficient travel scheduling.
- Designed an **interactive UI** with a **patriotic theme**, smooth hover animations, and rounded buttons for an engaging experience.
- Built a **review and rating system** for each tourist spot to enhance reliability and user trust.

Gesture Controlled Virtual Mouse 🔗 | [Python](#), [OpenCV](#) & [MediaPipe](#)

Jan 2025

- **Developed a touch-free virtual mouse system** that enables users to control mouse cursor and actions using hand gestures captured through a webcam.
- Implemented **real-time hand detection and tracking** using **MediaPipe** and **OpenCV** to capture live video frames and extract hand landmarks.
- Mapped **finger positions to mouse events** (e.g., moving cursor, left click, right click, scroll) using gesture recognition.
- **Processed video frames** in real-time to detect hand landmarks (e.g., fingertips) and translated these into corresponding system mouse controls.

NexCard 🔗 | [React](#), [Vite](#), [Tailwind CSS](#), [Web Crypto API](#)

May 2025

- Built a **full-stack digital profile card manager** enabling users to store and organize all their online identities — [GitHub](#), [LeetCode](#), [LinkedIn](#), bank cards, and more — in a **unified stacked card interface** with cloud-backed user accounts.
- Implemented **AES-256-GCM encryption** using the browser-native **Web Crypto API** to generate secure shareable links with separately distributed decryption keys, ensuring end-to-end privacy during card sharing.
- Designed **8+ card templates** ([GitHub](#), [LeetCode](#), [Codeforces](#), [LinkedIn](#), Debit/Credit, Email, Custom) with **sensitive field masking** — card numbers and CVVs hidden by default with a reveal-on-click toggle.
- Developed a **responsive glassmorphism UI** with [Tailwind CSS](#) featuring search, tag-based filtering, pinned cards, and smooth [Framer Motion](#) animations for an intuitive user experience.

CERTIFICATIONS

- ORACLE Multicloud Architect Professional
- ADOBE UI/UX Graphic Design Certificate
- SQL Intermediate
- Graph Theory Programming Camp
- AWS Certified Cloud Practitioner

ACHIEVEMENTS

- SQL Intermediate
- 4 Stars in Python on HackerRank
- Adobe India Hackathon
- Participated in CSS Battle
